| | | | | |
|-----------------|--------------|------------|------------|-------------|
| KEYWORDS | Perspective | Projection | Crating | Isometric |
| | Orthographic | Rendering | Tone | Enhancement |
| | | | Conversion | |

| Grade | Knowledge | Prior knowledge | End of topic |
|-------|--|-----------------|--------------|
| 8 - 9 | I can... Accurately identify all of the different drawing techniques covered Draw in 3D with some accuracy and precision for most of the drawing techniques covered Render a 3D drawing using the three tone rendering technique with skill and a degree of precision which demonstrates an understanding of light and reflection | | |
| 6 - 7 | I can... Accurately identify most of the different drawing techniques covered Draw in 3D with some accuracy for at least two of the drawing techniques covered Effectively add colour and textural qualities using the three tone rendering technique | | |
| 4 - 5 | I can... Recognise and label different types of Three Dimensional drawings Draw in 3D using at least one of the techniques with some accuracy Add colour with tone to enhance a drawing to make it look more realistic and three dimensional | | |

Challenge!

What areas of the four key concepts for Design & Technology have you worked in during this cycle?

Why are we learning how to draw using technical drawing techniques?

You are learning to draw effectively in 3D so that you can:

- Communicate your ideas clearly to the viewer
- Develop your ideas appropriately in preparation for what is required at GCSE level and beyond
